## INDIANA – CLIMATE

<https://www.britannica.com/place/Indiana-state/climate>

Air temperatures in Indiana have a wide annual range due to the state's location and its natural characteristics. The state record observed daily maximum temperature is 116 degrees at Collegeville on July 14, 1936. The record minimum temperature is -36 degrees observed on January 19, 1994, at New Whiteland. January is typically the coldest month of the year with normal daily maximum temperatures ranging from 31 to 38 degrees north to south across Indiana. Normal January minimums range between 15 and 21 degrees north to south. July is the warmest month with daily maximums averaging 80 to 83 degrees and minimums 63 to 65 degrees north to south. Winters have been milder than usual during the last decade due to the strong influences of El Nino on Indiana weather. Prolonged severe hot and cold spells are uncommon in Indiana.

Average annual precipitation ranges from 37 inches in northern Indiana to 47 inches in the south. May is the wettest month of the year with average rainfall between 4 and 5 inches across the state. Average rainfall decreases slightly as summer progresses. Autumn months are drier with 3 inches of rainfall typical in each month. Indiana winters are the driest time of year with less than 3 inches of precipitation commonly received each month. February is the driest month of the year statewide, then precipitation increases in March and April as the spring soil moisture recharge season begins. On average precipitation occurs every third day in Indiana.
